

Lake View in Bloom

Lake View Cemetery has over 200 acres planted with shade trees and other ornamental plants. The long-term care that we provide our landscape enables many specimens to mature and display characteristics rarely seen elsewhere.

The list below, with approximate bloom times and locations, is designed to let you enjoy the beauty of nature one plant at a time. The time designations used below correspond to the following: early month is from the 1st to the 10th; mid-month is from the 11th to the 20th; and late-month begins on the 21st. Plants are listed in their approximate order of bloom.

Cemetery maps are available from this website by going to **LAKE VIEW CEMETERY** in the left column of the home page, or from the office located inside of the Euclid Avenue gates.
